UNIVERSITY PAPERS

There are three required papers: Paediatrics, Evidence-Based Medicine (including clinical epidemiology and biostatistics paper), and a registrar-chosen paper (approved by RNZCUC). The Education Committee is responsible for deciding which courses, papers, and qualifications meet the Fellowship 'university paper' criteria. It accepts a broad range of university papers, qualifications, and courses, and some medical college courses and qualifications, including Fellowships.

This document lists some of the specific papers that are accepted, some of the broad categories of papers, qualifications, and other courses from universities and medical Colleges that may be accepted. Registrars are encouraged to submit suggestions for courses of study for consideration.

Before committing to any university paper or equivalent that is not on the list, registrars must confirm with the Education Committee or Director of Clinical Training that it is acceptable.

Reimbursement of fees for HWNZ-funded registrars

Registrars apply, and pay for, the university papers themselves. Once they have sucessfully completed the paper, they complete this document requesting reimbursement and send it to the College along with relevant documentation (pass certificate and original GST invoice/receipt from the university paper). On receipt of all necessary documentation, the College will reimburse the university paper fee (up to the HWNZ amounts allowed) for courses that are a requirement of your training programme.
